LAMB IN SEASON

Sausages of all kinds a Specialty. Virginia Street, Reno, Nev. Jan17

### THE OUTDOOR CHURCH.

The carved pillars of the trees.  
The flowered mosaic of the grass.  
The green, transparent traceries  
Of leaf on leaf that lightly lies  
And lightly moves when breezes pass.

The anthem of the waterfall,  
My choirster the blackbird's lay,  
And, mingling with, suffusing all,  
Borne by the wind and still let fall,  
The incense of the new mown hay—

This is my church, my altar there.  
Here earth, the kindly mother, kneels  
Her mighty hands outspread in prayer.  
While o'er her brow the mummy air,  
A south wind full of blessing, steals.

She wraps me in her mantle fold,  
I kneel and pray beside her there  
As children do when mothers hold,  
And hying air and sunlight gold  
And wood and meadow pray with me.  
—Eva Keane in Spectator.

### BUTTERWORTH'S THEORY.

His Lenient Way of Treating For Reformation Embryo Criminals.

Commissioner of Patents Butterworth is one of the men who believe that a prosecuting attorney is better engaged in side tracking embryo criminals on the road to perdition and getting them on the road to righteousness than in corralling them for shipment to the penitentiary, where they are thrown into association with professional crooks. Several years ago Major Butterworth was prosecuting attorney in southern Ohio and he had the opportunity to test his theory regarding the discrimination that should be used in dealing with men newly launched into crime. A young farmer was arrested for passing counterfeit shipplasters, as the 50 cent note was known, and the case was put in the hands of Major Butterworth. The young man told his story. He had saved several hundred dollars, had left his wife and little children and had taken a boat down the Mississippi river, purposing to settle on a new farm he was to buy with his hard earned savings. On the boat he met an extremely pleasant and well dressed stranger, who learned of his mission and proceeded to make himself agreeable. In a moment of extreme confidence the stranger told the young man of a large quantity of money he had which was made from plates that had formerly belonged to the government and which the government had long since sought to recover, etc. The young man was struck by that remarkable method of acquiring wealth when he had toiled and saved for years to get his few hundred. In a burst of generosity the stranger offered to exchange some of his money for greenbacks belonging to his now found friend, so that the latter should have two dollars for every one he possessed. The bait was tempting and the fish bit. At the next landing the well dressed man disappeared from the boat and the dupe became alarmed. He became suspicious of his new money and was afraid to offer it in payment of his passage. He, too, left the boat, determined to go back home. He started to walk and became footsore. He began shoring the money to buy something to eat, the counterfeit was discovered and the arrest was made. Major Butterworth took in the situation.

"I told that young man," he said, in relating the story, "that if God had made him a dishonest man he had failed to put a sign on his face. I told him to go home to his wife and children as an honest man. He could scarcely realize that he had escaped the penitentiary. He went home, and a more honest or better citizen I do not know today. That man had not the heart of a criminal, but if he had been sent to the penitentiary his children would have been disgraced for life and probably he would have belonged to the criminal class for life."—St. Louis Republic.

**Ants With Pluck and Brains.**  
To the intellectuality of ants, which men like Sir John Lubbock have always delighted to point out, a new proof has been added by the observations of a well known scientist, Professor Bonatti, who has communicated it to the Venetian institute. He noticed that the ants used as a bridge the twig of a tree which touched a house they were desirous of reaching. He accordingly cut off the end of the twig so that it was impossible for them to get across and then watched.

After the lapse of half an hour, however, he found that the procession which he had stopped had reformed itself. He proceeded to investigate the matter, and he found that the little ants had discovered that there was another twig which, when it was blown by the breeze, touched the wall now and then. The army of ants had formed up in line to this twig, and whenever the breeze blew it against the wall the foremost members of the band took advantage of the opportunity to get across. Man, with all his boasted genius, could do nothing more, for not only did the operation require clever timing, but absolute confidence in making what, under the circumstances, must have been a venturesome leap.—Strand Magazine.

**A Boy's Thirst For Knowledge.**  
Little Boy—I wish I was a great philosopher like you.

Great Scientist—And why, my son?

"Cause you know everything, and there's some things I can't understand, but if I was like you I could."

"Tell me one of them."

"Well, for one thing, I'd like to know why photographers can take pictures of comets on meteors and flying cannon balls and lightning flashes and yet they can't photograph a boy without squashing his head in a pair of pinchers."—Pearson's Weekly.

**Conventional Pitfalls.**  
Miss Meadowsweet—Excuse my ignorance, but ought I to call you Mr. Squills or Dr. Squills?

The Doctor—Oh, call me anything you like. Some of my friends call me an old fool.

Miss Meadowsweet—Ah, but that's only people who know you intimately!

—London Punch.

When a man gets to the point where he has to reject the deadly extracts of opium under the skin in order to get rest and sleep, the grave is not far distant. The time to take care of health is before it is utterly and irretrievably gone. The man who works on and on, utterly heedless of health and too busy to occasionally take a little necessary medicine, is committing suicide as surely as if he turned a pistol on his heart. Such a man dies by little degrees. First a little indigestion and a little neglect. Then loss of appetite. The bowels get clogged and the blood receives poisons instead of healthy nutriment. Old inert tissues in flesh, muscle, nerve and brain are not replaced by new. The whole body gets stale. The very sleeping-room of a man in this condition is filled in the morning with unwholesome odors as if it had been occupied by a decomposing corpse. It has been occupied by a man half-dead. The poisoned brain refuses to sleep and hates to work. Then comes the resort to the hypodermic injection of morphia and—speedy death. All this may be prevented by the use of Dr. Pierce's Golden Medical Discovery. It corrects all disorders of the digestion, makes assimilation perfect, fills the blood with the vital elements that make new tissue, builds healthy flesh, firm muscles, strong nerves and active brain cells. It drives out impurities and disease. Thousands of men in all walks of life have testified to its wonderful merits.

It's an insult to your intelligence for a dealer to attempt to palm off upon you a substitute for this world-famed medicine. You know what you want. It's his business to meet that want. When he urges some substitute he's thinking of the larger profit he'll make—not of your welfare. Shun all such dishonest dealers.

The man or woman who is regular as clock-work is seldom troubled with disease or mental or bodily lassitude. Dr. Pierce's Pleasant Pellets are a safe, sure, speedy and permanent cure for constipation. One little Pellet is a gentle laxative, and two a mild cathartic. They never gripe. You will have reason to regret it if you let a dishonest druggist induce you to take a substitute.

Representative Charles S. Hartman, of Montana, who left the Republican National Convention when it declared for the gold standard, states what he believes Congress will do at the coming session with reference to financial measures. He says he has no doubt that the House will pass a financial bill, in fact it will pass whatever measure it is told to pass. It will be told to pass a bill embodying in substance the scheme of the Indianapolis Bankers' Convention, which has been made by adopting the policy of the Republican Administration. The scheme has three main provisions, one of which is the perpetual maintenance of the gold standard, for which all bimetalists who still adhere to the Republican party will be called upon to vote. Another is the retirement of greenbacks and Treasury notes, for which at least one hundred members of Congress, who are opposed to it, will vote under orders given them to do so. The third is to transfer to the banks the right to issue all paper money used by the people.

The Constitution gives to Congress, and to Congress only, the right to coin money and to regulate the value thereof. That power, according to Mr. Hartman, a Congress elected by the money trust proposes to delegate to the money trust. Greenbacks and Treasury notes, which bear no interest and which are issued direct by the Government, are to be retired and the money trust is to be authorized to issue what paper money it can loan at profitable interest on good security, that paper money to be secured by non-taxable, interest-bearing bonds, the people to pay the interest. That is what the Indianapolis convention, which was run by the money trust, decided upon and which the President and the Congress elected by the trust has adopted as the policy of the Government.

The only obstacle in the way of this scheme is the United States Senate. That body, notwithstanding its subservience to the sugar trust, is not yet owned by the money trust, and it may defeat its attempt to get full control of the financial affairs of the Government and make money scarce and dear or plentiful and cheap, as it may find most profitable.

#### A WEDDING WAY.

Statisticians say that since 1891, when the gold standard was securely fastened on the country as President Harrison's Administration could make it, the percentage of marriages in proportion to population show a marked falling off from the preceding years, when the country was fairly prosperous. The tendency to bachelorhood was very noticeable in Nevada, as the decline in the price of silver resulting from the closing of the mints to that metal, and a corresponding decline in the price of real estate and farm products, caused general depression. Mining camps were abandoned, farms were mortgaged, men thrown out of employment, enterprise paralyzed and the bottom seemed to have dropped out of the country. As gold was made to do double duty as money by reason of the demonetization of silver, it appreciated in value, while the prices of all other things depreciated proportionately. Under such conditions prudent young people, who knew the extra expense entailed by marriage, considerably refrained from incurring it, and the result was fewer weddings, not only in Nevada but throughout the whole country.

Now, owing to abundant crops at home and a failure of crops abroad, farmers in the wheat producing sections of the country are comparatively prosperous and there is a boom in the marriage business. At Lovelocks, which is one of the richest and most productive agricultural valleys in the State, the wheat crop was remarkably heavy this year and the price of the cereal was higher than at any previous time since 1891. Farmers realized handsomely from their grain and one of the results is more weddings in a few weeks than there had been before in as many years. Ministers and Justices of the Peace are kept busy tying the nuptial knot, new residences for the young people are being built and more land for farms is being reclaimed from the desert. It is believed that before the dawn of 1898 there will not be a marriageable woman on the Humboldt in single blessedness and that young women will be at a premium all because of bountiful crops and good prices.

Attorneys Deaprey, Dickinson and Boardman appeared before Judge Bahrs yesterday and asked that a day be set for the trial of Durrent for the murder of Minnie Williams. Assistant District Attorney Hosmer opposed the motion. Judge Bahrs exhibited considerable impatience during the argument of the attorneys, and finally, in an angry manner denied the motion and refused to hear anything further on the matter.

The Secretary of the Treasury has ordered that employees who receive stated salaries and refuse to pay their debts must give satisfactory reasons for not settling their accounts or suffer the consequences, which will probably be, dismissal from the service.

#### TELEGRAPHIC NEWS.

The French torpedo boats No. 133 and Dondari de Legree collided while maneuvering at Algiers and No. 133 sank while the other was badly damaged.

The Secret Service Bureau announces that a new ten-dollar silver certificate and also counterfeit notes on the First National Bank at Jocklin, Missouri, are in circulation.

George Winston, alias Devil Winston, the murderer of Vinnie Bell at Paducah, N. Y., was hanged there yesterday. He warned all people to beware of bad company and whisky.

The examination of A. W. Hall at San Diego, charged with attempting to murder four companions on the sloop Grace at Rosalia Bay, was concluded yesterday and the accused discharged.

The Secretary of the Treasury has ordered that the clerks receiving stated salaries who neglect to pay their debts contracted for will have to present satisfactory reasons for not doing so.

Alderman Durham of Minneapolis, charged with soliciting a bribe of \$10,000 from a contracting firm, was convicted yesterday. This is the first conviction in the Alderman boodle case.

Twenty masked men attacked Geo. Roehl and Martin Bartholomew and four other miners on the night shift at the Kolb coal pit near Mascouta, Ill. Both of the above named men are fatally injured.

Snow fell at Portland, Oregon, yesterday morning to a depth of three inches. Reports from the interior of Oregon state that the storm is general and should a thaw occur there is danger of flood.

The quarantine has been raised among the smaller towns near New Orleans and the people are breathing much easier. The yellow fever is abating and it is now believed there is no further danger of its spread.

Geo. Bogart, ex City Clerk of Evanston, Ill., pleaded guilty yesterday to having embezzled the funds of the city. The amount is said to be nearly \$10,000. Bogart has turned property valued at \$12,000 to Mayor Doche of Evanston.

The Government is preparing its case against the Central Pacific Railway in anticipation of that company's default in its payments due January 1, 1898. The proposed action in case of default has not as yet been given out.

The fire in the Smuggler mine at Aspen, Col., still rages and the situation is growing more serious. Efforts are being made to draw the gases from the mine, but the work is very difficult and a failure means the destruction of the mine.

The boiler in Milton Artley's large woodworking factory at Carleton, Mich., exploded yesterday morning, killing Edward Geralt, fireman, and injuring Fred Artley, son of the owner, Ols Baker and Cyrus Burrows. The force of the explosion shook every building in town.

Joseph A. Springer and Senor Julio Astago, who were sentenced to death at Havana and have since been pardoned, sailed for New York yesterday. The crew of the schooner Competitor, the members of whom were under the death sentence, have also been pardoned and sailed for New York.

The authorities of Chicago are making a close investigation into the circumstances surrounding the death of John B. Ketchum. The physician's prescriptions and other matters during his last sickness are being thoroughly investigated. There is great interest in the case, but no report has as yet been given out.

The steamship State of California arrived in Astoria harbor yesterday morning two days overdue from San Francisco. Captain Green reported heavy weather off Cape Mendocino and that the gale reached the force of a hurricane. Light ship No. 67, off the Columbia bar, slipped her moorings and drifted about until taken in tow by the United States steamship Columbia.

Tom O'Rourke, manager of Joe Walcott, upon hearing Sharkey's declarations after the fight that he would meet anyone in the world without drawing the color line, challenged the sailor in behalf of Joe Walcott. O'Rourke offers to wager \$7,500 against \$15,000 that Walcott will stay a certain number of rounds with Sharkey at catch weight and later O'Rourke posted \$1,000 with Charles Ascher to evidence his good faith.

A disastrous fire is raging in London, England. In several streets adjacent to the general postoffice, huge blocks of buildings are blazing fiercely. The fire brigade gave up hope of subduing the fire and devoted every energy to preventing its spreading. Sixty warehouses have already been destroyed, besides a vast amount of other property. No estimate can be made as yet of the loss, but it is given roughly at \$10,000,000. Engines from all parts of the city are working at the fire, and the crowds of people watching the destruction are immense.

#### Millions in Sight.

The White Pine News says: At Silver Peak in Esmeralda county, the sand hills at the foot of the Red mountains have been discovered to carry \$2 per ton in gold. A surveyor has been there running lines for a week cutting them up into twenty acre tracts for such locators as John W. Mackey, Clarence Mackey and others. It is estimated that this sand can be worked at a cost of 50 cents per ton, and there are millions of tons in sight.

Every one who wishes to enter this contest must send us with their answer the above grand offer.

## OUR CAVALRYMEN BEST.

French Horses, However, Are Superior to Those Used Here.

The French horseman does not ride as well as his prototype in the United States regular army, but the horses of the French army are better and more serviceable than those in the United States. The half bred barbs of the chassours are up to any amount of work, and the heavier Normans and Bretons of the dragons and cuirassiers, although perhaps too light for the weight they carry, are splendid specimens of horseflesh. The French artillery—believed elsewhere than in France to be the corps d'élite of the army—was beyond praise. The physique of the personnel of the field and horse batteries is superior to that of the line, and the average efficiency of the officers is higher. The steel gun that is armed with is a most effective weapon—the fieldpiece of 90 mm., weighing 10.43 hundredweight, and firing a 17.98 pound common shell, 18.5 pound shrapnel; the horse artillery gun weighing 8.86 hundredweight, with a 13.15 pound common shell and a 13.84 shrapnel.

The large number of batteries attached to an army corps—more than four guns to 1,000 infantry and cavalry—is not the only indication that the French place great reliance upon their artillery. The batteries as they marched past presented an admirable appearance. The old maxim of "split and polish" was not as minutely carried out as is the case with the batteries of the United States regular army. The steel hames and collar chains were in some instances not as bright as they might have been, nor were the leather harnesses absolutely immaculate, but the horses are beyond criticism, and everything pertaining to each piece and each caisson is thoroughly serviceable and businesslike.—New York Tribune.

**The Most Costly Fruits.**  
Hothouse grapes are the costliest of fruits. They are never less than 75 cents a pound, and when they are most costly, in February and March, they sell for \$9 a pound, sometimes going as high as \$10 a pound. At prices ranging up to \$2 a pound there is a ready sale for them. At the higher prices they are sold almost exclusively for the use of invalids. There is a sale for all that are produced, but the production is great, and the vines may die from exhaustion after a single season of forcing.

The next most costly fruit is the hothouse peach. Hothouse peaches sell in February at \$2.50 each. They are used mainly by invalids, but such peaches are also often sold for gifts. They are presented as flowers or as bouquets would be. Three or four peaches are packed in cotton and set off with a few peach leaves in a handsome box. Hothouse peaches run down to about 60 cents each in April and May, when we begin to get the first of the peaches from the south.—New York Sun.

## BREVITIES.

F. J. Winchell was a passenger for California last evening.

Henry Dixon, a progressive farmer of Lovelock, is visiting Reno for a day or two.

A. Benson, who has been visiting Reno for a few days, returned to his home at San Jose last evening.

For a good meal, lunch or hot tamale go to the Washoe Lunch Counter, also liquid refreshments of all kinds.

Prof. Orvis Ring came in from Verdi last evening and remained over. The Professor always has a kindly feeling for Reno.

Hot drinks of all kinds at the Wine House, also fancy and mixed beverages and Rabstaller's Gilt Edge beer on draught.

George Fahrion, the plasterer, has gone to Greenville and will work on the new Indian school in course of construction there.

The United States Weather Bureau gave a forecast yesterday of rain last night turning to snow and to-day much colder weather.

H. Ritor does a general jobbing trade in wines and liquors. His stock is carefully selected and consists of superior goods. Orders promptly attended to.

Virginia City, Butte and Bodie mines are the only ones in which miners now receive the old scale of \$4 per day. The ruling wages in California are \$2.50 to \$3.

Thyres's is the only place in the State where fresh bay city oyster cocktails are served free as a side delicacy to liquid refreshments. Upon tamales from the noon hour to midnight.

H. Leter has ordered and will receive in a few days a lot of crimson and gold stripe sweaters. These are the University colors and Mr. Leter has ordered them especially for the students.

Tom and Pat McDermott, charged with appropriating lumber and other property at Fort Halleck in Humboldt county, were brought in yesterday by Deputy Marshal Ferguson and taken to Carson for trial.

Lumrich's new stock of dry goods, ladies and childrens jackets and capes, ladies and childrens underwear is as complete as most any store can furnish and prices are still the same as before the tariff came into effect. oct10lf.

Pat Henry of Truckee arrived from Susanville last evening and remained over. Pat is not as young as he used to be, but he is the same old genial fellow that manipulated lightning in the early seventies for the information of the world in general.

The Secret service announces that a new counterfeit \$10 silver certificate is in circulation, also counterfeit notes on the First National Bank of Joplin, Missouri. These counterfeits will doubtless find their way to this coast, and the public is advised to look out for them.

A. T. Dormio received a carload of grapes from California yesterday and another car is on the road. Mr. Dormio had provided a wine press and placed it in the rooms formerly occupied by the W. U. Telegraph Company and will convert the grapes just received into wine. It is an experiment, but Mr. Dormio believes that he can make it pay.

Ed. Linstrom, formerly of Reno but late of San Francisco, is paying his Reno friends a visit. Ed says that "love's young dream" isn't what it's cracked up to be when it gets down to common-places every day events. He used to gaze upon the silvery moon in rapturous and romantic ecstasy, but now a red light in front of a 5-cent beer joint produces the same exhilarating effect.

A colonization society is about to be organized in Carson. M. Cohn, a merchant of means, energy and ability, is at the head of the movement. It is expected to establish many colonies in Nevada within the next year. There are many desirable localities for colonists in the State, and as there are hundreds of thousands of people seeking homes an effort will be made to locate some of them in Nevada.

A furious wind and rain storm has prevailed over the North Pacific Coast for twenty-four hours or more. The wind attained a velocity of fifty miles an hour and about four inches of rain fell at Portland, Oregon. The rivers are raging, telegraph wires are prostrated and the custom house at Yakima Bay was blown down and the records lost in the bay. The Weather Bureau reports the storm here and predicts much colder weather to-night and to-morrow.

I have just received a complete and well selected stock of gents' furnishing goods, underwear, overshirts, socks, suspenders, handkerchiefs, ties, etc., which I guarantee to be equal if not better than any in the town, which I will sell at prices that defy competition. My stock of domestic and imported cigars and tobaccos is complete in every particular, comprising such brands as the Nerve, Carl Dunder and Royal in the 5-cent goods, and El Belmont, Sanchez, Hays, De Vallens, Informations, Hotel Brunswick, General Arthur and many others in the imported goods. Call and be satisfied. Free employment office in connection with the store. tf A. NELSON.

## WEATHER BULLETIN.

(Copyright, 1897, by W. T. Foster.)

St. JOSEPH, Mo., Nov. 20.—My last bulletin gave forecasts of the storm wave to cross the continent from the 22d to 26th.

The next disturbance will reach the Pacific coast about Nov. 27th, cross west of Rockies country by the close of the 28th, the great central valleys the 29th to 31st, the Eastern States December 1st.

The warm wave will cross the west of the Rockies country about Nov. 27th, great central valleys 29th, Eastern States Nov. 31st. The cool wave will cross the west of the Rockies country about Nov. 30th, great central valleys Dec. 2d, eastern States the 4th.

Temperature of the week ending November 27th will average about normal, including a warm wave and a cold wave.

The last week in November will average colder than usual.

Heavy rains or snows will fall in large portions of the country west of Mississippi river during the week ending December 17th.

In next week's bulletin will be given a general forecast of December weather.

## DECEMBER WEATHER.

The national weather bureau has the following to say about the general features of average December weather:—

"Beginning with December, and in some years with the middle of November, the turbulent circulation of the highs and lows in the United States that is characteristic of the winter season is especially to be considered.

"This greater rapidity of movement and eccentricity of direction is primarily to be referred to the fact that the sun is in the Southern hemisphere, so that the temperatures in the polar regions are greatly lowered and the barometric pressure increased."

"The Tropics are of course at practically the same temperature throughout the year, but in the Northern winter the contrast in temperature between the arctic and tropical belt is relatively great, and this gives an increase of power to the thermodynamic engine which the atmosphere of the earth really is at all times.

"The effort of the two regions of different temperature is to restore the equilibrium that is disturbed by the solar radiation, and this is accomplished by the mechanism of the high and low circulation.

"There is no portion of the world where this interchange of cold and warm air is so pronounced in latitude as the United States, and this needs a very clear explanation for full comprehension of the meteorological problem.

## The Fireman's Masquerade.

The Reno Firemen are making preparations for one of the grandest masquerade balls on next Thursday night ever given in Reno. The hall will be made comfortable for spectators as well as dancers, the music will alone be worth the price of admission and the elegant costumes will surpass anything of the kind ever seen in the town. There will be comic and original characters; also groups of eight or more.

The prizes, now on exhibition in Mr. Herz's window, have been selected with a view of giving all an opportunity to compete, and the winners will be well paid for their trouble.

The boys deserve to be helped, and in the course of a year they ask for comparatively little, yet they are diligent and always ready night or day or in any kind of weather to answer a fire alarm. In the course of a year they save thousands of dollars worth of property and it is no more than fair to give them a benefit.

## Gold Creek Company Reorganized.

A reorganization scheme is the latest information on the completion of the Gold Creek mining company.

Some of the New York stockholders became dissatisfied with the management of J. L. Robertson and F. Hopkins, a Wall Street manipulator, was elected president in the place of Mr. Robertson. Mr. Hopkins is reported to be a shrewd business man, and one who commands capital. With Mr. Hopkins at the head of the company it is now asserted that the reorganization of the company's affairs will soon be completed, money subscribed, the indebtedness liquidated and a redividus of Gold Creek will follow.

The mines have not been touched yet, so that no estimate can be arrived at as to the merits of the properties. The old management failed just at a time when the water was ready to be turned on to the placer grounds.—Ex.

## Bowdoin Beats Harvard Record.

Edward R. Godfrey, Bowdoin, '99, in a strength test according to the Sargent method, at Brunswick, Me., October 30, showed a total strength of 1716. This breaks the best Harvard record. Verrill of Yale stands ahead of Godfrey, but Harvard men do not wholly allow his mark, claiming that more than the required time was taken to complete the test. Godfrey's test was made without rest, showing strength of lungs, 18; upper arms, 476.2; back, 349; legs, 717; fore arms, 163; dipped, 36; pulled up, 22. Godfrey is a Bangor youth, is 19 years old, 6 feet 4 inches in height and weighs 206 pounds.

## Big Stock Purchase.

James Newlands, who has charge of the Newlands Ranch at Fort Churchill, has lately completed the purchase of 1,100 head of beef cattle from Fred Dauberg of Carson Valley. The cattle will be taken to the home ranch and fattened for the San Francisco and Eastern markets.

Window glass cut all sizes at Lange & Schmitt's.

Royal makes the food pure, wholesome and delicious.

Messrs. Muller & Stampf, of the Babst Agency carry an excellent stock of wines and liquors. The wines are especially adapted for medicinal purposes. Orders filled in quantities to suit and all goods guaranteed. \*tf.

## THE STORM.

Heavy Rain on the Coast and Storm Indications Throughout the West.

It began raining here at 11 o'clock last night. The rain was preceded by gusts of wind from the southwest and the indications were favorable for a heavy storm. Reports from Truckee, Summit, Cascade, Colfax and other points at 1 o'clock this morning gave rain all the way down the line with low barometer.

The storm is general on the Coast, with center of disturbance in Southern Oregon and working south. Weather Bureau forecasts cold to-night and snow in some districts.

Old timers on the mountains say that the present downpour is the forerunner of a long and hard winter, and that Thanksgiving will bring snow. L. D. Folsom is furnishing the finest of four-foot wood by the cord or carload at the very lowest figures.

## Removal Sale.

Mr. R. E. Queen having become the owner of the Chambers building occupied by me as a dry goods store, has concluded to make important changes in the building which necessitates my moving temporarily to some other place. Preparatory to moving I must reduce my stock of dry goods and will therefore sell at a great reduction my entire stock consisting of Dry Goods of all qualities in latest styles, Ladies and Childrens Jackets, Capes in cloth and plush, Blankets, Flannels, Ladies cloth, Lace Curtains, Bedspreads, Ladies and Childrens underwear and hundreds of articles of fancy goods. The reduction is sweeping and customers will be saving on all purchases. S. FARRICH.

## Next door to Nevada Bank.

The Viavi Work.

In no way can we do more good than in restoring the sick to health. This Viavi will do, if intelligently used.

Have you stomach trouble? Use our Tablets.

Have you piles? Use our Sano.

Have you catarrh? Use our Catarrh Remedy.

Are you weak and all run down? Use Viavi.

Come and see me and I will fully explain the use of all our remedies.

Mrs. B. E. HUNTER.

Fourth street.

## Violin Lessons.

Professor David Wolf of Carson has violin class in Reno. All those desiring his services please leave word at Sol Levy's dry goods store. 11-31f.

## A SOAP BUBBLE.

The Relation of Its Varying Thickness to the Colors It Shows.

The extreme thinness of the bubble is indeed wonderful. It is estimated that the film in some places is only one three-millionths of an inch in thickness. Probably few of us can conceive of such thinness. Let me express it in another way. The Old and the New Testament contain some 8,000,000 of letters. Now one three-millionth is such a part of an inch as the first letter of the Bible is a part of the sum of all of its letters.

The bubble, however, is not of equal thickness at all points; and it is for this reason that it has the various colors. For instance, wherever the film is orange red it measures about three-millionths of an inch; where it is blue, eighty-one-millionths of an inch; and at a point where lemon yellow is prominent about twenty-one-millionths of an inch. Perhaps you wonder why the colors change from one part of the soap bubble to another. This is because the film of the soap bubble evaporates and grows thinner, but unequally so at different portions. A greenish blue with a pale rose red spot near it indicates an extreme thinness, and at such a point the film is ready to give way at the least jar.

You will be glad to know the source of the beautiful colors. Every one is delighted with them, even if not interested by the explanation of their origin. We may say that they come from the light. Light gives color to all objects, but not exactly as it does to the soap bubble. White light from the sun can be broken into the seven colors which we have seen in the rainbow. In that instance, the raindrops separate it into its parts. A glass prism will do the same, as you may prove by looking through a glass pendant from a hanging lamp. When the light reaches the surface of the soap bubble, a part is reflected from it, and we see images on its surface as if it were a curved mirror. Another portion of the light, however, enters the film and is separated so that parts of the seven colors are thrown into the bubble, and we can see them at various portions of the opposite surface. Another part of the light, after being broken by the film, is reflected by its inner surface back to our eyes, so that we see colors at the point where the light enters.—Jacob F. Bucher in St. Nicholas.

## THE WONDERS OF A WATCH.

Few Persons Know How Great Its Marvelous Powers Are.

A Boston jeweler who has a talent for advertising as well as a genius for mechanics has been reminding his patrons lately that a watch is the smallest, most delicate machine that was ever constructed of the same number of parts. About 175 different pieces of material enter into its construction and upward of 2,400 separate operations are comprised in its manufacture.

Some of the facts connected with its performance are simply incredible, when considered in total. A blacksmith strikes several thousand blows on his anvil in a day and is right glad when Sunday comes around, but the roller jewel of a watch makes every day and day after day 432,000 impacts, against the fork, or 157,680,000 blows in a year without stop or rest, for 3,163,600,000 in the short space of 20 years.

These figures are beyond the grasp of our feeble intellects, but the marvel does not stop here. It has been estimated that the power that moves the watch is equivalent to only four times the force used in a flea's jump; consequently it might be called a four flea power. One horsepower would suffice to run 270,000,000 watches.

Now the balance wheel of a watch is moved by this four flea power one and forty-three one-hundredths inches with each vibration—8,558 1/2 miles continuously in one year.

If you would preserve the timekeeping qualities of your watch, you should take it to a competent watchmaker once every 18 months.—Youth's Companion.

## Worth Appreciated.

In his younger days the late Mr. W. H. Smith was usually present to see the morning papers dispatched, and one morning something at one of the offices had gone wrong, so that there was great risk of that paper missing the trains. Mr. Smith, recognizing the difficulty, threw off his coat, worked away as hard as any of his subordinates and had the satisfaction of seeing the vans leave with just time to catch the trains.

He was afterward leaning over one of the tables reading a paper, still in his shirt sleeves, when one of the men, mistaking him for a mate, gave him a resounding smack on his broad back, exclaiming:

"Well, Jack, old man, we got that lot away smartly." When "W. H." raised himself, the man rushed away, terrified by his blunder.

On coming on duty at night the man received a note addressed to him, which he concluded contained the "sack," but to his surprise it was to inform him that from the end of that week he would be a foreman. "W. H." had sense enough to see that a man who was so delighted at having accomplished a difficult task for his employers was made of the right stuff.—Pearson's Weekly.

## Motherly Solicitude.

Miss Ante—It's funny about our old cat. We can't keep her away from the poker table.

Mr. Ago—Nothing strange about that. Naturally she's looking after the "kitty."—New York Tribune.

## For Over Fifty Years.
